Justin Napolitano

Orlando, Florida

LinkedIn **GitHub**

Summary

- Business and clinical data analyst specializing in healthcare analytics, Epic Clarity SQL, and performance improvement.
- Experienced with heart failure quality metrics, readmissions, and enterprise BI tooling including Power BI and GCP-based stacks.
- Bridges technical and non-technical stakeholders to deliver data products that improve outcomes and reduce costs.

Platform Highlights

1 dot = 1 year of experience

Warehousing & Modeling

Snowflake
SENIOR

APIs & Web Apps — 2 yrs

Experience

Data Engineer — AdventHealth

Aug 2025 — Present

Orlando, Florida

- Stand up Azure Data Factory + Synapse pipelines that land Epic Clarity extracts into governed models for quality and operations teams.
- Build Power BI and Looker Studio dashboards that surface heart failure and readmission metrics for service line leaders within 24 hours of discharge.
- Harden dbt and SQL transformations that reconcile EDW, Vizient, and bedside documentation into one source of truth for CFO and CMO briefs.
- Partner with nursing, cardiology, and digital to automate alerts, reducing manual spreadsheet updates by 60% across the network.

Azure Data Factory | Synapse | Power BI | Looker Studio | dbt | Epic Clarity | SQL

Business Analyst II — AdventHealth

Jan 2025 — Aug 2025

Orlando, Florida

- Partnered with clinical and operations teams to define data requirements for performance and quality improvement initiatives.
- Designed SQL-based reporting pipelines and Power BI dashboards for inpatient care and readmissions metrics.
- Supported data validation and reconciliation efforts across Epic Clarity and EDW environments.
- Contributed to cross-functional analytic projects focused on cost reduction, patient outcomes, and digital health integration.

Epic Clarity | SQL | Power BI | Enterprise Data Warehouse | Healthcare quality metrics

Data & Analytics Engineer — Penske Media Corporation

Apr 2022 — Apr 2024

Los Angeles, California

- Led evaluation of six AI and data vendors, assessing integration, latency, and scalability to guide $5M in platform investment decisions.
- Fine-tuned large language models using Python, improving generative quality by 10% based on editorial scoring loops.
- Built twelve Python- and SQL-based reporting pipelines in GCP, integrating with Looker to deliver topic insights across thirty media brands.
- Increased subscription conversion rates by 5% through KPI reporting in GCP that powered targeted marketing runs.
- Modeled first-party user behavior in Treasure Data CDP using 150+ signals to support retention and exec briefings across Rolling Stone, Billboard, and more.

Python | SQL | GCP | Looker | Treasure Data CDP | Large language models | AI vendor evaluation | Subscription analytics | Customer segmentation

Independent Data Consultant — BTJN

Jan 2020 — Apr 2022

Houston, Texas

- Implemented two customer data platforms to improve audience segmentation and campaign targeting for 2M+ high-value prospects.
- Migrated three legacy systems to GCP, doubling data processing speeds and streamlining analytics workflows.
- Automated email marketing pipelines that converted 10% of 5,000 cold leads into qualified clients.

GCP | Customer data platforms | Marketing automation | ETL and system migration

Research Assistant — University of Central Florida

Jan 2018 — Aug 2019

Orlando, Florida

- Designed a rubric for coding international human rights violations using statutes from major global treaties.
- Led a five-person research team to develop an open-source MySQL database documenting systemic abuses across global conflict zones.
- Co-authored an analysis on gender-based violence published by De Gruyter and presented at the International Criminal Court in The Hague.

Projects

Heart Failure Quality Metrics Dashboard

AdventHealth – Epic Clarity / Power BI

- Designed and implemented a reporting suite for heart failure populations, covering I/O compliance, GDMT discharge, EF capture, and readmission metrics.
- Developed a reusable data dictionary and benchmarking logic to support Power BI dashboards and documentation.
- Standardized ICD-10-based cohort definitions and EF extraction logic across multiple reporting workflows.

Epic Clarity | SQL | Power BI | Heart failure quality measures

Observed-to-Expected Mortality Analysis

AdventHealth – Vizient data

- Built an observed-to-expected (O/E) mortality analysis pipeline using Vizient data to identify performance gaps by service line and DRG.
- Collaborated with clinical leaders to translate O/E insights into targeted quality improvement initiatives.

Vizient clinical data | SQL | Risk-adjusted metrics

AI Agent for Hospital Supply Chain

Independent exploration

- Explored design of an AI agent to assist hospital supply chain and procurement teams with forecasting, vendor evaluation, and contract analysis.
- Drafted a conceptual architecture for data ingestion, retrieval-augmented generation, and workflow integration.

LLMs | RAG | Healthcare supply chain

Education

BA, Political Science

August 2017

University of Central Florida • Orlando, Florida

Statistics Specialization

August 2018

University of Central Florida • Orlando, Florida

Python 3 Specialization

January 2020

University of Michigan • Online

Coursera specialization focused on Python 3 programming and applied data analysis.

Publications

Turkish Kurdish Analysis Database
